

AMENDMENTS TO THE ABSTRACT

Please substitute the following paragraph(s) for the abstract now appearing in the currently filed specification:

ABSTRACT

A mounting arrangement for the internal dividing elements of refrigerators and freezers, which includes a compartment having two lateral walls, each carrying at least one rail on which is slidably seated an adjacent lateral portion of an internal dividing element to be horizontally displaced between a first position, in which it is retracted inside the compartment, and second positions, in which it is partially displaced forwardly and outwardly from the compartment. Each rail includes a flat horizontal upper track and a lower track, each lateral portion of the internal dividing element including a seating surface, to be slidably seated on the upper track of the respective rail, and a retaining surface disposed below the lower track.
